

# SAHASENDURE SOLUTIONS

From Compliance to Culture , End-to-End EHS Solutions “That Work on Ground”

## ABOUT US

Sahasendure Solutions LLP is an execution-focused Environment, Health & Safety (EHS) consultancy, established to serve high-risk industries across India. We help manufacturing plants, construction projects, corporate campuses, and logistics facilities achieve full regulatory compliance, reduce operational risk, and build audit-ready EHS management systems.

Unlike conventional advisory firms, our consultants work on the ground — embedding within site operations to ensure that safety frameworks are not merely documented, but actively implemented, monitored, and sustained.

Backed by a team with experience spanning industry operations, regulatory environments, ISO certification, and domain specialisms in fire safety, process safety, and industrial hygiene, we bring both technical rigour and practical insight to every engagement.

## INDUSTRIES WE SERVE

Manufacturing & Process Industries	Construction & Infrastructure	Corporate / IT Park & Real Estate	Corporate / IT Park & Real Estate
------------------------------------	-------------------------------	-----------------------------------	-----------------------------------

## ENGAGEMENT MODELS

### Project-Based Engagement

Scoped, time-bound engagements for compliance audits, risk assessments, fire safety reviews, PSM studies, or documentation projects. Ideal for targeted intervention.

### Retainer / Outsourced EHS

Ongoing dedicated EHS support on a monthly retainer.

We function as your extended EHS team — handling compliance monitoring, audits, regulatory liaison, and reporting continuously.

## OUR APPROACH

# SAHASENDURE SOLUTIONS

From Compliance to Culture , End-to-End EHS Solutions “That Work on Ground”

## OUR TAILORED SOLUTIONS

### Environmental Compliance

- Environmental compliance audits
- PCB liaison & regulatory interface
